# More Than Straight Teeth

The Damon Ultima™ System delivers a natural broad arch smile with teeth standing upright and aligned in a smile arc. This results in a proper bite and reduces dark corners in your mouth. More than two-thirds of patients prefer this type of smile.<sup>2,3</sup>

## Natural Broad Arch Smile

Tipped-in teeth reduce brightness with dark corners.

A bright, broad arch smile shows more teeth.

## Smile Arc

Teeth that appear at the same level create a flat smile.

A smile arc has the curve of the teeth that follows the lower lip.

## Upright Teeth for Proper Bite

Teeth may appear straight but still tipped in or flared out.

Teeth in the correct position help the jaws function properly.

# See the Difference with Damon Ultima™ Brackets

The Damon Ultima System uses a patented technology that allows the wire to move teeth with gentler forces and less friction.

Traditional Braces with elastics

Damon Ultima™ Braces without elastics

## Versus Traditional Brackets, Damon Ultima Brackets:\*\*

- Do not need elastics to tie down wires. Elastics can cause friction and discomfort, slowing treatment and collecting bacteria.
- Provide easier to maintain oral hygiene.
- Work with more gentle forces which move teeth more efficiently and with greater comfort.
- Lower the risk of side effects including less damage to roots.
- Require on average less treatment time and fewer appointments.\*

\*\*Data on file.

Ormco Digital Bonding (ODB) is a fully digital and customizable alternative to traditionally bonded braces. ODB is designed to make bonding appointments quicker and offer a more comfortable patient experience.

**86%** of the patients treated with ODB found the bonding process painless and quick.\*

# This is how it works

- 1 Your doctor will digitally scan your smile and create a unique treatment plan that fits your goals.
- 2 Customized placement guides called jigs will be 3D printed according to your treatment plan and filled with Damon Ultima Brackets.
- 3 Your doctor or clinical technician will bond brackets to your teeth with the jigs' assistance to ensure consistent placement.
- 4 Start on your journey for a more beautiful and healthy smile for a lifetime!\*

"With Ormco™ Digital Bonding, our bracket bonding appointments have become quicker, which leaves more time to educate patients about the experience they are embarking on."
